

Gerhard Besau

Engineering Services, OeBB-Infrastruktur AG, Wien/Vienna, Austria

Speaker Qualifications

Gerhard Besau, born 1959 in Vienna, Austria, employed since 1975 at Austrian Federal Railways (OeBB). Concerns within the construction department; planning/design of tracks and stations.

Member of project team “Product development passenger terminals” and development team “Static and dynamic passenger information systems” – resulting in an IF communication design award 2004.

Member of the design teams “Vienna main station” and “Salzburg main station”.

Multimodal Passenger Information Systems in the New Central Stations of Salzburg and Vienna

The presentation will focus on the requirements of passenger information resulting from the specific concept of the main railway stations in Vienna and Salzburg, both in construction.

The integration of different dynamic and static information systems from the Federal Austrian Railways, the Vienna Public Transport (Underground, Tram, Bus) and the Salzburg Local Railway will be shown at the actual projects in Vienna and Salzburg also the first operating solutions at the experimental station “Baden” of the OeBB.
